LEGALEASE: AI-POWERED LEGAL DOCUMENT GENERATOR

Phase 1: Brainstorming & Ideation Phase

The brainstorming and ideation phase focuses on identifying a practical problem in legal document preparation and developing an AI-based solution to address it.

LegalEase is proposed as a Generative AI-powered application that helps users create structured legal documents based on their requirements.

The system is designed to generate documents such as:

- Contracts
- Agreements
- Non-Disclosure Agreements (NDAs)
- Other formal legal documents

The user provides information such as document type, parties involved, terms and conditions, and effective dates. The system uses Gemini AI to generate structured document content.

The main objective is to combine **Generative AI, FastAPI, Streamlit, and document-generation technologies** to simplify legal document creation.
