LEGALEASE: AI-POWERED LEGAL DOCUMENT GENERATOR

Phase 2: Requirement Analysis Phase

In this phase, the functional and technical requirements of LegalEase are identified.

Functional Requirements

The application should allow users to:

- Select a legal document type.
- Enter the parties involved.
- Enter terms and conditions.
- Enter effective dates.
- Generate a legal document using AI.
- Preview the generated document.
- Edit the generated content.
- Download the document in different formats.

Input Requirements

The system accepts:

- Document type
- Parties involved
- Terms and conditions
- Effective date

Output Requirements

The application generates:

- Structured legal document text.
- HTML preview.
- Editable document content.
- TXT document.
- DOCX document.
- PDF document.

Technical Requirements

The project uses:

- Python 3.10+
- FastAPI
- Uvicorn
- Streamlit
- Google Generative AI SDK
- Pydantic
- python-docx
- FPDF
- Pillow
- Requests
- python-dotenv
