LEGALEASE: AI- POWERED LEGAL DOCUMENT GENERATOR

Phase 4: Project Planning Phase

The project is divided into milestones and activities to organize the development process.

Milestone 1: Model Selection and Architecture

The appropriate Generative AI model is selected based on the requirements of LegalEase.

Selected Model: Gemini 1.5 Pro

The model is intended to support:

- Long-context processing.
- Structured prompting.
- Complex text generation.
- Multi-part inputs.
- Generation of organized documents.

Development Environment

The environment is prepared with:

- Python 3.10+
- Virtual environment
- FastAPI
- Uvicorn
- Streamlit

- Google Generative AI SDK
- python-docx
- FPDF
- Pillow
- Requests
- python-dotenv

The application structure is planned into separate frontend, backend, AI, and document-formatting components.
