LEGALEASE: AI-POWERED LEGAL DOCUMENT GENERATOR

Phase 5: Project Development Phase

This phase focuses on implementing the main functionality of LegalEase.

Milestone 2: Core Functionality Development

Legal Document Generation

The system accepts:

- Document type
- Parties
- Terms
- Dates

These details are passed to Gemini through the document-generation module.

Gemini generates structured legal document content based on the provided information.

Document Formatting

The generated document is converted into multiple formats.

DOCX

The DOCX generator supports:

- Headings

- Structured sections
- Appropriate fonts
- Tables
- Logo/branding
- Footer

Function:

```
format_docx(text, doc_type)
```

PDF

The PDF generator supports:

- Headers
- Structured content
- Branding
- Footer
- Printable formatting

Function:

```
format_pdf(text, doc_type)
```

HTML Preview

The generated document is converted into an HTML format for display inside the Streamlit interface.

Function:

```
format_html_preview(text)
```

Document Editing

Users can edit the generated legal content before downloading it.

Download

Users can download the completed document as:

- `.txt`
- `.docx`
- `.pdf`
